
Enumeration Steps
Reduction Steps
1. Base Graph
2. Circuit Structure
3. Map Components
1. Remove Linear Circuits
2. Remove Series Linear Circuits
3. Remove Duplicates
4. Unique Nonlinear Circuits
Select
Δ base graph
=
C L J
capacitor, inductor,
or Josephson junction
n components in circuit
c choices per component
n^c possible circuits
e.g.
e.g.
e.g.
4 unique circuits out
of the original 27
